

AX-RETRIEVAL TOOL KIT

AX Mechanical Retrieval Tool Kit

Pressure ratings up to 6000 psi (413 bar)

Temperature Ratings up to +260°C (+500°F)

Axess Mechanical Retrieval Tool Kit

Axess offers a retrieval system consisting of retriever and service valve that can be used to safely and efficiently to insert and retrieve probes/coupons/sensors/chemical injection assemblies from a process whilst operating under full pressure.

Axess corrosion provide full training on maintenance and operation of both the Retrieval Tool and Service Valve. For more information please contact an Axess Expert.

Key Features

- 6000 PSI Rating / No telescoping parts
- Side wheel manipulation to allow safe operation
- Positive indication of full insertion or retrieval of plug/sensor assembly to avoid operation errors
- Full compatibility with systems manufactured by other suppliers
- Lightweight construction for single person operation

Letter	Description	Maximum Pipeline Size								
		4"	8"	12"	16"	20"	24"	30"	36"	40"
A	Retrieval Tool Overall Length - inches	39	47	55	63	71	79	91	103	111
B	Retrieval Tool and Service Valve Overall Length to Pipe OD (includes non-tee access fitting) - inches	54	62	70	78	86	94	106	118	126
C	Stroke Available - inches	18.5	22.5	26.5	30.5	34.5	38.5	44.5	50.5	54.5
